REACH registration period of chemical substances and preparations

Dear customer,

As a Company, Frapak packaging b.v. are fully committed to meeting its obligations under the European REACH Regulation.

I am happy to report that the products which you buy from us are considered as articles and we are considered as a downstream user in the chemical supply chain.

As a precaution, we have been contacting suppliers to gain their confirmation that no substances or preparations which do need registration are used in the formulation of our raw materials.

* Substances of Very High Concern (SVHC), included in the most recent and authentic "Candidate List of Substances of Very High Concern for Authorisation", in a concentration above the threshold limit of 0.1%, as published by the European Chemicals Agency (ECHA) on <http://echa.europa.eu/web/guest/candidate-list-table>

*Substances such as mentioned in Annex XIV of EC Regulation 1907/2006/EC

Although these substances as such are not intentionally added to this material, and the absence has not been checked by tests, this does not exclude the presence of negligibly slight traces due to, amongst others, impurities in the components supplied by external parties and used in the production of such components.

If this situation changes, we will contact you immediately with our proposed solution.

If you need to make specific further enquiries about our products and REACH compliance, please let us know and we will do our best to answer them or pass them on to the relevant person of our suppliers who can help.

Best regards,

Frapak packaging b.v.
